

EXPLORE

EXpeditionary Program for Learning OppoRtunities in analog space Exploration

GET TO KNOW US!

What is EXPLORE?

EXPLORE is an initiative designed to engage students in space exploration while aligning with STEAM curriculum requirements. It involves hands-on activities simulating Moon or Mars missions and offers comprehensive training and support for educators to integrate these experiences into their teaching.

Initially targeting students in Greece, Portugal, and Austria, the project aims to expand globally with a virtual toolkit.
